How to install IIS webserver on Windows 11 ??

Step 1: In Windows 11, navigate to Control Panel > Programs > Programs and Features > Turn Windows features on or off.

Step 2: Expand the **Internet Information Services** node and make sure the following features are selected.

- IIS Management Console
- .NET Extensibility 4.8
- Application Initialization
- ASP.NET 4.8
- ISAPI Extensions
- ISAPI Filters
- Default Document
- Static Content

Step 3: Click **OK** to install the selected features.

Step 4: Open a Web browser and input "http://localhost/" in the address bar.

The IIS welcome screen displays, which indicates the **Default Web Site** is working properly.
